Description

There are a number of issues exist at checking a Linux 3.14 kernel. Most of them are related to the wrappers generator that helps to call static functions outside of files with their definition.

History

#1 - 02/13/2020 01:33 PM - Ilja Zakharov

- Status changed from New to Resolved

Most of the issues are fixed except for several drivers. Implementation resides in fix-emg-fails branch.

#2 - 02/13/2020 04:49 PM - Evgeny Novikov

- Status changed from Resolved to Closed

Tests passed, so, I merged the branch to master in [7f9ea38d5](#).
