

Klever - Bug #10163

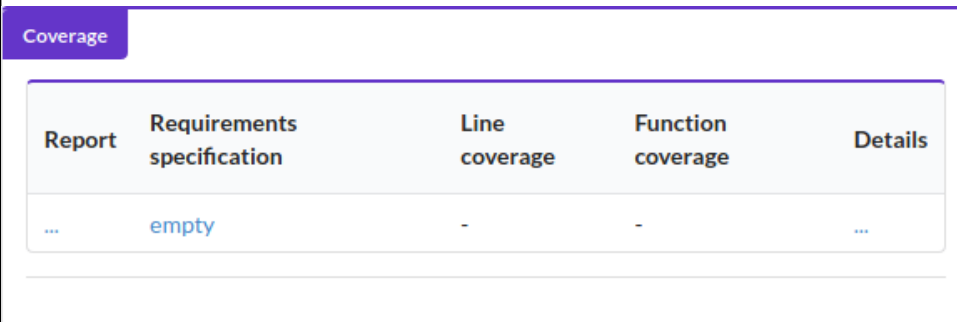

Bridge does not show total coverage

03/13/2020 02:07 PM - Ilja Zakharov

Status:	Rejected	Start date:	03/13/2020
Priority:	Immediate	Due date:	
Assignee:		% Done:	0%
Category:	Bridge	Estimated time:	0.00 hour
Target version:	3.0	Published in build:	
Detected in build:	git		
Platform:			

Description

Total coverage visualisation became recently again broken. Core sends the report successfully (and I confirm that it is non-empty), but there is no information about the total coverage on the page.

It is still possible to look at coverage reports of separate modules. And there is no any errors in the Core log.

History

#1 - 03/13/2020 02:14 PM - Evgeny Novikov

- Priority changed from Urgent to Immediate

It is a crucial regression.

#2 - 03/13/2020 06:25 PM - Vladimir Gratinskiy

It seems like the celery task for recalculation coverage statistics is not finished yet or failed. Please attach logs for the failed task from "/admin/django_celery_results/taskresult/" if any or reload the decision page.

#3 - 03/25/2020 02:23 PM - Ilja Zakharov

- Status changed from New to Closed

The problem was caused by an incorrect version of celery package.

#4 - 03/25/2020 02:40 PM - Evgeny Novikov

- Assignee deleted (Vladimir Gratinskiy)

- Status changed from Closed to Rejected

The issue was not valid.
