

Klever - Feature #10794

Add notes from CPAchecker SMG to code coverage

04/07/2021 02:08 PM - Evgeny Novikov

Status: Resolved	Start date: 04/07/2021
Priority: Urgent	Due date:
Assignee: Evgeny Novikov	% Done: 0%
Category: Results processing	Estimated time: 0.00 hour
Target version: 3.2	
Published in build:	
Description Bridge supported visualization of notes from code coverage in our own format a long ago. Recently CPAchecker SMG started to produce some notes for code coverage in the LCOV format. Let's convert these notes from the LCOV format to our own format.

- Status changed from New to Feedback

I forgot to mention that I implemented this feature in branch *coverage-notes*, but I need a feedback from Anton. Moreover, at the moment there is a hardcoded kind for notes from CPAchecker SMG while potentially there may be different kinds and this should be obtained in addition to notes themselves from code coverage reports.

#4 - 05/13/2021 08:11 PM - Evgeny Novikov

I merged this branch to *better-code-coverage*.

#5 - 05/13/2021 08:11 PM - Evgeny Novikov

- Status changed from Feedback to Resolved

It looks like everything is okay with support of notes for code coverage in Klever.
