

Klever - Bug #7160

Refined view doesn't operate faster than the default one

Description

For instance, if a component have very many children and I specify just one of them by setting corresponding view filter it still takes too much time to generate a component page. It is okay when information on all children is shown but it isn't okay if just several ones are shown.

Is the problem still relevant in klever-3.0?

#2 - 12/04/2019 01:23 PM - Evgeny Novikov

- Target version set to 3.0

- Priority changed from Normal to Urgent

Let's investigate this when we will have an appropriate data. At the moment we have only small data sets.
