

Requality - Bug #7377

При ручном вводе значения для атрибута типа BOOL таблица атрибутов зависает

07/06/2016 05:36 PM - Viktoria Kopach

Description

В таблице атрибутов у атрибута установить тип BOOL, кликнуть по ячейке Value и вместо выбора из списка ввести значение вручную (не важно, корректное или нет). Потом кликнуть куда-нибудь еще, чтобы сохранить изменения. При этом режим редактирования этой ячейки не закрывается, даже если кликать на другие вкладки окна Properties и обратно.

Если кликнуть на другой узел в Requality Explorer, то все содержимое таблицы изменится на соответствующее этому узлу, кроме таблицы атрибутов. Она останется прежней, для узла, у которого устанавливали атрибут типа BOOL.

Вот так будет это выглядеть:

Здесь курсор находится уже в другом поле (Name), но ячейка Value как будто все еще находится в режиме редактирования.

В Error log сыпятся ошибки:
