#### Description

Translators in EMG do at some places Linux-specific operations related to callback calls preparation. Really specific things should be activated by an option.

#### History

##### #1 - 04/24/2017 12:23 PM - Evgeny Novikov

- Priority changed from Normal to Urgent

This is really important since we need to go beyond Linux kernel modules.

##### #2 - 08/25/2017 04:17 PM - Evgeny Novikov

- Target version set to 2.0

##### #3 - 12/29/2017 02:19 PM - Ilja Zakharov

- Status changed from New to Resolved

Implemented in 8066-abstract-translator. However, it contains too many improvements and changes comparing with master branch, so it should be considered later how to merge the branch to master and do we need to do some additional changes first.

##### #4 - 10/25/2018 09:18 PM - Evgeny Novikov

- Status changed from Resolved to Closed

Branch *klever-2.0* passed all tests and I merged it to master in [72be796e3](#) marked as *v2.0rc1*.
