Description			
By some reason I have about 5 thousands of files within directory <i>media/Service</i> which are obviously unused because of no verification job is decided. Unfortunately Manager can not delete these files using the corresponding action in Manager tools.

These files are used by Task/Solution models. Tasks are not deleted after the job decision by some reasons. For example, if there are finished tasks without solution. In this case I preserve tasks for users to analyze the problem. So I've added new button on manager panel "Remove tasks for not solving jobs" (Not solved, Pending, Corrupted, Terminated, Cancelled, Finished, Failed). Implemented in branch "feature_8397".
