Description

At verification of tests with Linux 2.6.33 I have found dozens of files with the same content generated for OBJCOPY elf64-x86-64 commands in LKBCE dir. In addition names of the files are generated incorrectly (instead of elf64-x86-64.ldv1, elf64-x86-64.ldv2, ... it creates elf64-x86-64.ldv1, elf64-x86-64.ldv1.ldv2, ...).

History

#1 - 10/24/2017 02:27 PM - Ilja Zakharov

I fixed names creation but only for this commands in "tests" branch. But there are more places rest with the same incorrect code, so refactoring is needed.

#2 - 10/24/2017 07:01 PM - Alexey Polushkin

- Status changed from New to Resolved

Resolved in branch 'fix_objcopy'

#3 - 10/25/2017 12:27 PM - Evgeny Novikov

- Status changed from Resolved to Closed

I merged the branch to master in [71df3325](#) without any testing. Let's wait for new failures if so.
