Description

I made an online version of the Klever documentation using Read the Docs service: <http://klever.readthedocs.io>

It is possible for commits to automatically trigger new builds of the documentation using webhooks, but it requires some setup. I haven't done it yet

Alternatively you can manually build fresh versions of the documentation - I can grant admin rights to the Klever project on Read the Docs for everybody who wants to do it.

Some changes are made in the online-docs branch.

History

#1 - 06/08/2018 02:28 PM - Evgeny Novikov

- Status changed from Open to Closed

Thank you, after small improvements I merged the branch to master in [fdc14d79](#). Don't forget to read README one more time!
