

Klever - Bug #9015

Cannot upload several jobs in one archive

06/27/2018 01:41 PM - Ilja Zakharov

Status:	Rejected	Start date:	06/27/2018
Priority:	Immediate	Due date:	
Assignee:		% Done:	0%
Category:	Bridge	Estimated time:	0.00 hour
Target version:	1.0	Published in build:	
Detected in build:	svn		
Platform:			

Description

If I select several root jobs from the jobs tree and download them and trying to upload to another machine I got:

```
job.json file was not found or contains wrong data
Traceback (most recent call last):
  File "/work/zakharov/src/klever/bridge/jobs/views.py", line 351, in get_context_data
    UploadJob(self.kwargs['parent_id'], self.request.user, job_dir.name)
  File "/work/zakharov/src/klever/bridge/jobs/Download.py", line 518, in init
    self.__check_job_data()
  File "/work/zakharov/src/klever/bridge/jobs/Download.py", line 543, in __check_job_data
    raise ValueError('job.json file was not found or contains wrong data')
ValueError: job.json file was not found or contains wrong data
```

Bridge never supported such feature. You can upload jobs together after unpacking and selecting jobs you need to upload. The only reason archive with jobs is single because I don't know the way how to download several files at once.

Sorry, I had an opposite opinion and asked Ilja to report a bug. Indeed, everything works as expected - [#6950](#).
