

Klever - Bug #9081

Uploading unsafe marks fail with unknown error

07/10/2018 11:06 AM - Evgeny Novikov

Status:	Closed	Start date:	07/10/2018
Priority:	High	Due date:	07/11/2019
Assignee:	Vladimir Gratinskiy	% Done:	100%
Category:	Bridge	Estimated time:	0.00 hour
Target version:	3.0	Published in build:	
Detected in build:	svn		
Platform:			

Description

For instance, try to upload the attached unsafe marks. There isn't any error messages in any log files.

In ideal all new marks from the archive attached to [#9080](#) should be uploaded without any errors. When uploading them there are plenty exceptions like:

Traceback (most recent call last):

```
File "/home/novikov/work/klever/bridge/marks/Download.py", line 249, in __upload_all
    mark_type = UploadMark(self.user, fp).type
File "/home/novikov/work/klever/bridge/marks/Download.py", line 159, in __init__
    self.mark = self.__upload_mark(archive)
File "/home/novikov/work/klever/bridge/marks/Download.py", line 203, in __upload_mark
    version['tags'] = list(tags_in_db[tname] for tname in version['tags'])
File "/home/novikov/work/klever/bridge/marks/Download.py", line 203, in <genexpr>
    version['tags'] = list(tags_in_db[tname] for tname in version['tags'])
KeyError: 'Patch'
```

Perhaps these exceptions also happen when uploading individual marks.

Most likely this is one more crucial regression to be fixed ASAP and backported to *v1.0-stable*, since before we didn't encounter such the errors.

History

#1 - 07/10/2018 02:45 PM - Vladimir Gratinskiy

The problem is there are no tags in the DB for marks. I can just create them at the root while uploading, but it is wrong. The tree structure of tags isn't saved in marks' archives.

Thus, it seems that this issue exists forever, is it?

And what is the right way to move marks from Bridge A to Bridge B? Should one download and upload all tags in advance?

Right.

And what is the right way to move marks from Bridge A to Bridge B? Should one download and upload all tags in advance?

If Bridge B doesn't have unique tags then yes. Otherwise user should create tags one by one before marks uploading.

If Bridge B doesn't have unique tags then yes.

Sorry, I thought that tags are deleted before uploading new (like marks). But they aren't. So you can just upload new tags tree for marks.

#5 - 07/10/2018 04:34 PM - Evgeny Novikov

- *Target version deleted (1.1)*

- *Priority changed from Immediate to High*

So, let's print a normal error message rather than "Unknown error" one day.

Discussion about tags downloading/uploading should be moved away.

#6 - 07/11/2019 03:57 PM - Vladimir Gratinskiy

- *% Done changed from 0 to 100*

- *Status changed from New to Resolved*

- *Due date set to 07/11/2019*

Already fixed in bridge-3.0.

#7 - 07/12/2019 02:58 PM - Evgeny Novikov

- *Target version set to 3.0*

#8 - 01/16/2020 05:19 PM - Evgeny Novikov

- *Status changed from Resolved to Closed*

In master.
