

## Klever - Feature #9349

### Support regular expressions for providing ideal verdicts

10/25/2018 06:05 PM - Evgeny Novikov

<b>Status:</b>	New	<b>Start date:</b>	10/25/2018
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Infrastructure of Core	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Published in build:</b>			

**Description**

At the moment one has to enumerate all program fragments or/and requirements when specifying ideal verdicts. Often there are common patterns like all unsafes for ".\*\_invoke.ko", all safes for ".\*safe.ko".

#### History

##### #1 - 01/25/2019 11:32 AM - Evgeny Novikov

- Target version deleted (3.0)
- Priority changed from Urgent to High
- Assignee deleted (Evgeny Novikov)

This is just a quite minor improvement.
