

## Klever - Bug #9367

### Misleading message in the error description

11/07/2018 06:56 PM - Vadim Mutilin

<b>Status:</b>	Closed	<b>Start date:</b>	11/07/2018
<b>Priority:</b>	Urgent	<b>Due date:</b>	
<b>Assignee:</b>	Evgeny Novikov	<b>% Done:</b>	0%
<b>Category:</b>	Infrastructure of Core	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	3.0	<b>Published in build:</b>	
<b>Detected in build:</b>	svn		
<b>Platform:</b>			

#### Description

I run validation set. I've got an exception:

```
File "/home/debian/klever-inst/klever/core/core/job.py", line 518, in __set_build_base raise FileExistsError('Build base "{0}" is not a directory'.format(build_base)) FileExistsError: Build base "/home/debian/klever-inst/klever/build bases/validation/7ce77510c9c7~" is not a directory
```

How this directory should be created?

#### History

##### #1 - 11/08/2018 05:00 PM - Evgeny Novikov

- Status changed from New to Rejected

This is not a bug at all. Redmine should not be used to ask such the questions.

##### #2 - 11/09/2018 12:38 PM - Vadim Mutilin

It was a question initially, but after finding a solution, I realized that the error message was misleading rather than helpful. The correct explanation should talk about wrong configuration of Job (job.json) (better to warn about exact field) or wrong configuration of Klever deployment (klever.json) (better saying what is missing there).

##### #3 - 11/09/2018 02:47 PM - Evgeny Novikov

- Target version set to 3.0

- Priority changed from High to Urgent

- Assignee set to Evgeny Novikov

- Status changed from Rejected to Open

- Category changed from Bridge to Infrastructure of Core

Okay, let's fix the error message. This is trivially.

##### #4 - 04/04/2019 10:28 AM - Evgeny Novikov

- Status changed from Open to Closed

I fixed that in [574ae7e84](#).
