

## Klever - Feature #9558

### Install entities properly

03/21/2019 10:30 AM - Evgeny Novikov

<b>Status:</b> Closed	<b>Start date:</b> 03/21/2019

**Description**

When dealing with [#6629](#), I noticed that deployment scripts do not install files, directories and archives properly. For instance, files and directories are renamed (e.g. from *toplevel.opt* to *CIL*), archives are compressed additionally before moving them to OpenStack instances, all actions are performed non-uniformly.

### History

#### #1 - 03/24/2019 03:14 PM - Evgeny Novikov

- Status changed from *New* to *Resolved*

I implemented this feature in branch *frama-c-cil*. After this update I am not sure that you will be able to update existing Klever instances. Anyway you will need to fix deployment configuration files (as usual you can find examples at *klever/deploys/conf*).

#### #2 - 03/25/2019 04:48 PM - Evgeny Novikov

- Status changed from *Resolved* to *Closed*

The branch was merged to master.
